E-commerce Dashboard

Homepage

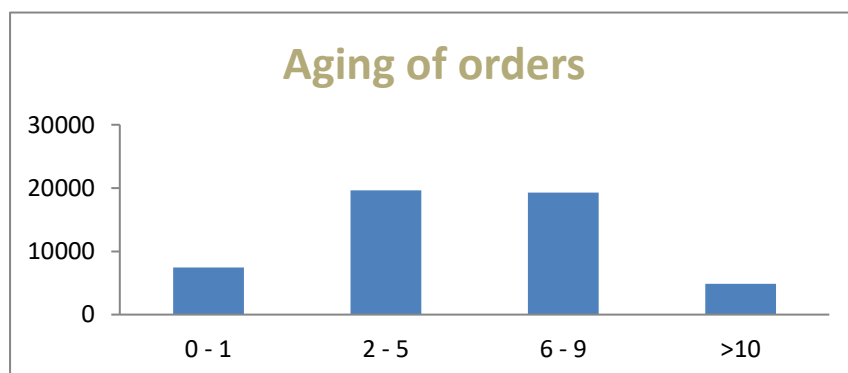

As per the problem statement, we have divided analysis into different sections: -

Aging of orders:

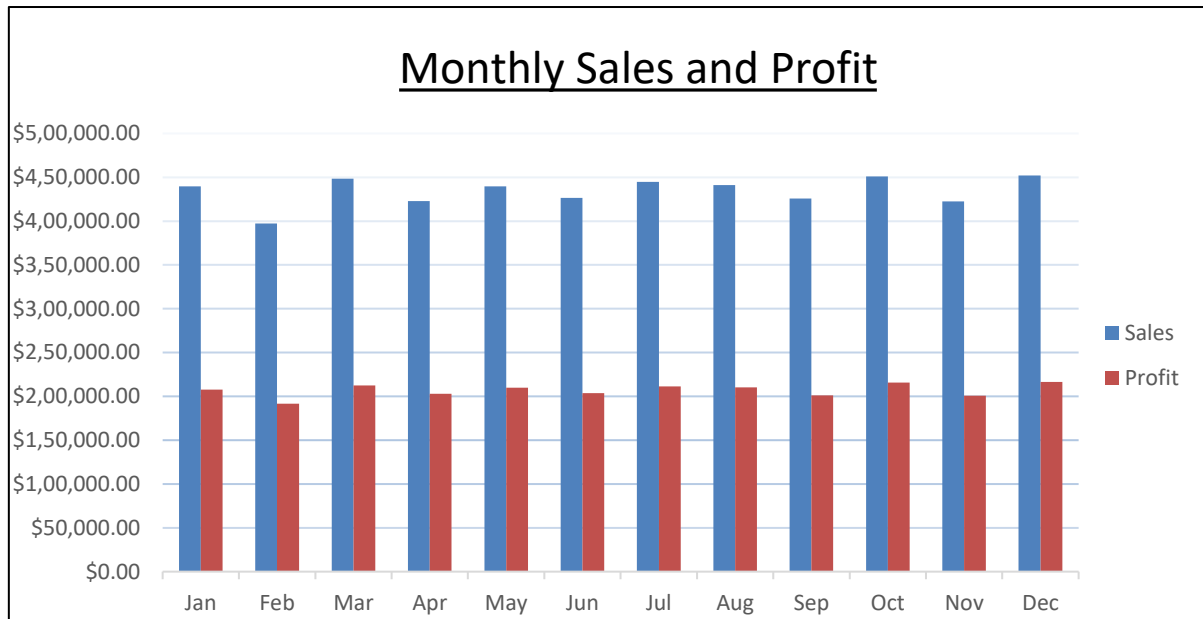

In this section we designed our first visuals and tried to interpret the followings

- Number of quantities deliver in given days.

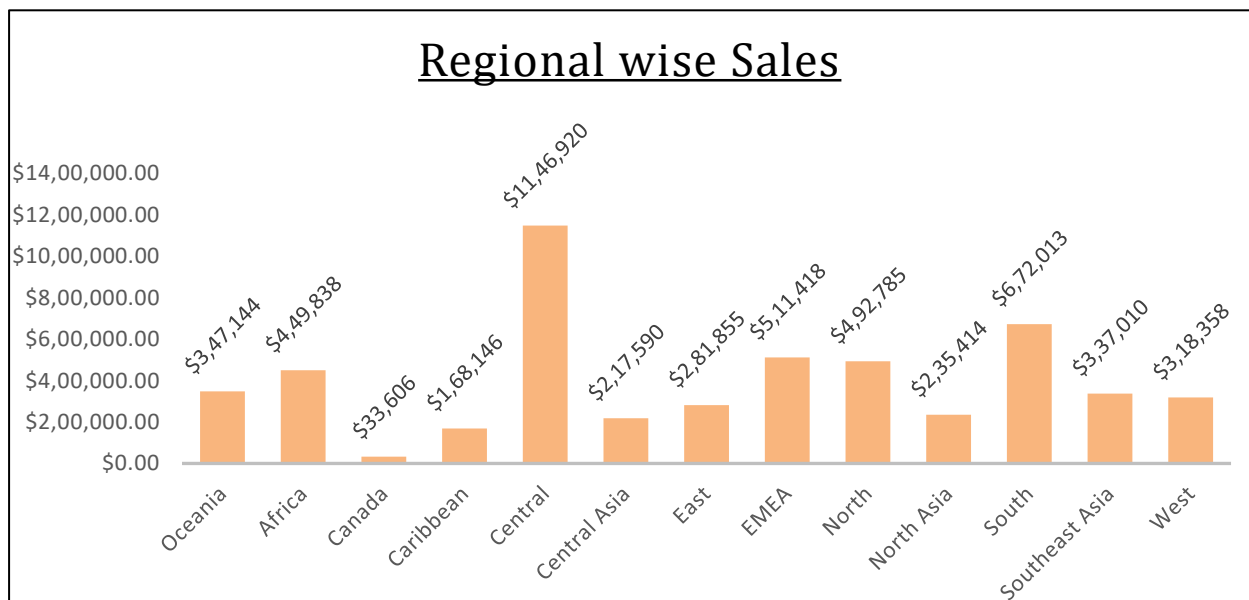

Monthly Sales and Profit:

- Sales and profit generated by category of items that we select from the drop-down list.

**Region wise Sales:**

- Sales of items by regions.

Drop-down pane for different categories:

- Use of combo box for selecting different categories and the visuals are changing according to that.
